

## Adjusting the Rear Suspension

Adjusting the suspension requires a pin spanner. We recommend that you have your vehicle serviced by your dealer.

### Spring Preload

You can adjust the spring preload by the adjuster to suit the load or the road surface. Turn the adjuster using a suitable pin spanner and extension bar.

Use the pin spanner and extension bar to turn the adjuster. Position 1 is for a decrease spring preload (soft), or turn the position 3 to 5 increase spring preload (hard). The standard position is 2.

#### NOTICE

Attempting to adjust directly from 1 to 5 or 5 to 1 may damage the shock absorber.

#### NOTICE

Do not turn the adjuster beyond its limits.

#### NOTICE

The rear shock absorber damper unit contains high pressure nitrogen gas. Do not attempt to disassemble, service, or improperly dispose of the damper. See your dealer.
